What is the EASI?

It is a portal that allows secure and traceable transactions of IBM technical information (design data, specifications, bills of material, and corporate standards) between registered suppliers and IBM using a web interface.

EASI uses either a BOX location to deliver the files or if no BOX id was specified during user setup, then the files can be downloaded locally to your machine from the application itself.

(Note: Your BOX id was requested during the time your access to EASI was granted. If you did not have a BOX id but now wish to associate your EASI id with a BOX id, please [contact support](#).)

Link to the EASI application and/or access request:

<https://www.ibm.com/procurement/plmeasi/EASI> (Note: if you do not have an IBM id, follow the Step 1 instructions here how to create one. If you do not have access to the EASI app, follow the Step 2 instructions.)

Need an individual free BOX id? <https://account.box.com/signup/n/personal#w3mgw> (Other plans- <https://www.box.com/pricing/individual>)

Delivery Options

Select a folder to have the documents delivered to:

- Default folder is **IBM EASI My Documents, Current Date/Time**: A new folder for each submission under the folder with your userid(email).
- Folder with your **Userid(email)**: All request files are copied in the same folder.
- Folder for **your company**: all requests files are copied into a dedicated folder for **your company** to which you will automatically be added as a collaborator.

Step 2 - Select formats then Submit to have the documents delivered to Box folder

<div> <div>IBM EASI My Documents, Current Date/Time</div> <div> <div>IBM EASI My Documents</div> <div>IBM EASI My Documents, Current Date/Time</div> <div>IBM EASI Team Documents</div> </div> </div>		Formats Available	View	Status	Release Date	Basic Name

[BOX Drive-An Alternative to BOX Sync](#)

Box Drive is the incredibly simple way to work with all of your files — even billions of files — right from your desktop, taking up very little hard **drive** space. Open your Windows Explorer or Mac Finder to find every file you need, edit like you would any local file and save it automatically to the cloud.

To learn more: <https://www.box.com/resources/downloads/drive>

[View My Documents and Team Documents](#)

This allows you to review previous requests you have made, whether they were delivered to BOX or to your local machine.

Upon selecting this menu item, you are presented with two folder options:

Refresh

Back

Cancel

Show 10 entries

▲ Name	▲ Updated
 IBM EASI My Documents	Sep 17,
 IBM EASI Team Documents	Aug 18,

View Folder

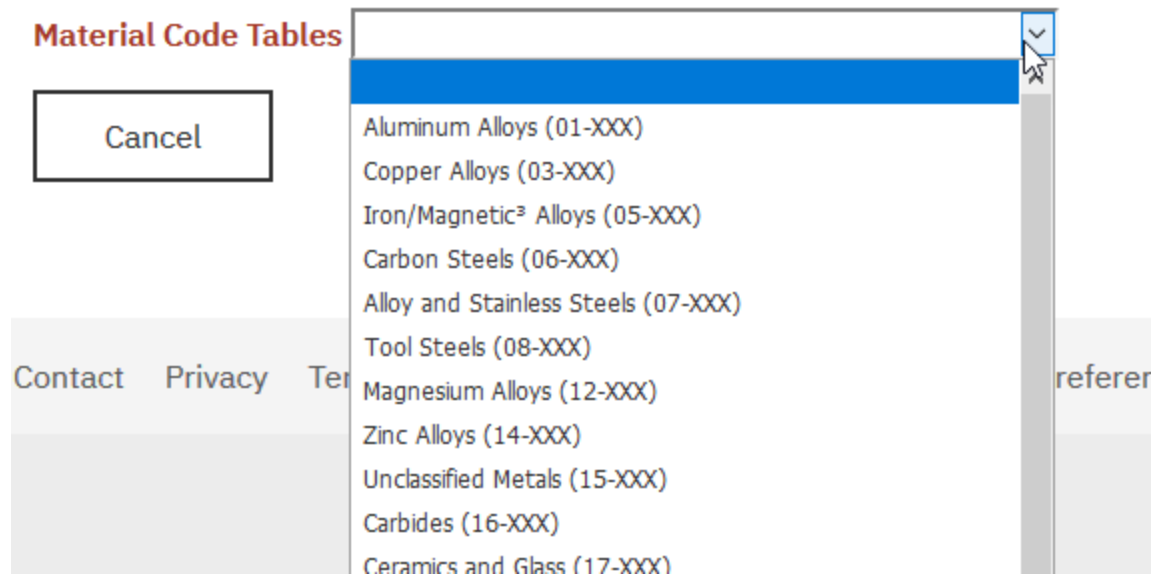

The first option "...My Documents" will display all your requests you have made in the last 14 days. Selecting these link will take you to the BOX folder where they are stored or if you do not have a BOX id allow you to download the file again.

▲ Name
 000000AD005.10000N34637B.Additional Item Info.html
 000000AD005.10000N34637B.Explode.csv
 000000AD005.10000N34637B.Explode.html
 2018-08-24 11.04.01

The 2nd option, "...Team Documents", will list any files that you or a colleague wanted to share with you in the last 14 days.

Material Codes:

Selecting Material Codes, will bring you to drop down list of the available codes by material.

Selecting one, will then bring up a listing that you can either review or use the Search box to further refine your search.

Material Code Tables Show entries

Code	Description
01-000	Aluminum, or aluminum alloys. For existing part prints which do not specify a temper, use the temper designation A, unless otherwise specified. Information on tolerances for raw stock material is given in ASTM B 209-6361-4 for aluminum sheet, strip, and plate and ISO 6362-2-1 for aluminum extruded shapes. ISO temper designations for aluminum and equivalency to ASTM temper designations are given in Table 1.
01-010	Aluminum, commercially pure
01-011	Aluminum, commercially pure, 99.99 percent
01-012	Aluminum, commercially pure, 99.60 percent aluminum, 0.20 percent copper
01-020	Aluminum alloy, high strength, heat treatable, categorical code; Comprised of the following codes: 01-132, 01-141, 01-162, 01-163, 01-165, 01-253, 01-292, 01-312.

In the example above using pure as a search term would result in the following shortened list:
